

Now more than ever, we understand the importance of maintaining hygiene in interior spaces we frequently touch such as such as toilet and shower partitioning.

Laminex has taken the lead with the introduction of Protec+, an antimicrobial surface technology that inhibits the growth of bacteria, fungus and now the COVID-19 virus, so whether you choose Multipurpose Compact Laminate or Structural MR MDF the surface will be protected.

Protec+ Fast Facts

Peace of mind

Laminex Protec+ antifungal and antibacterial properties do not wipe off or leach out of the surface. This gives you enhanced antimicrobial protection for the expected life of the surface.

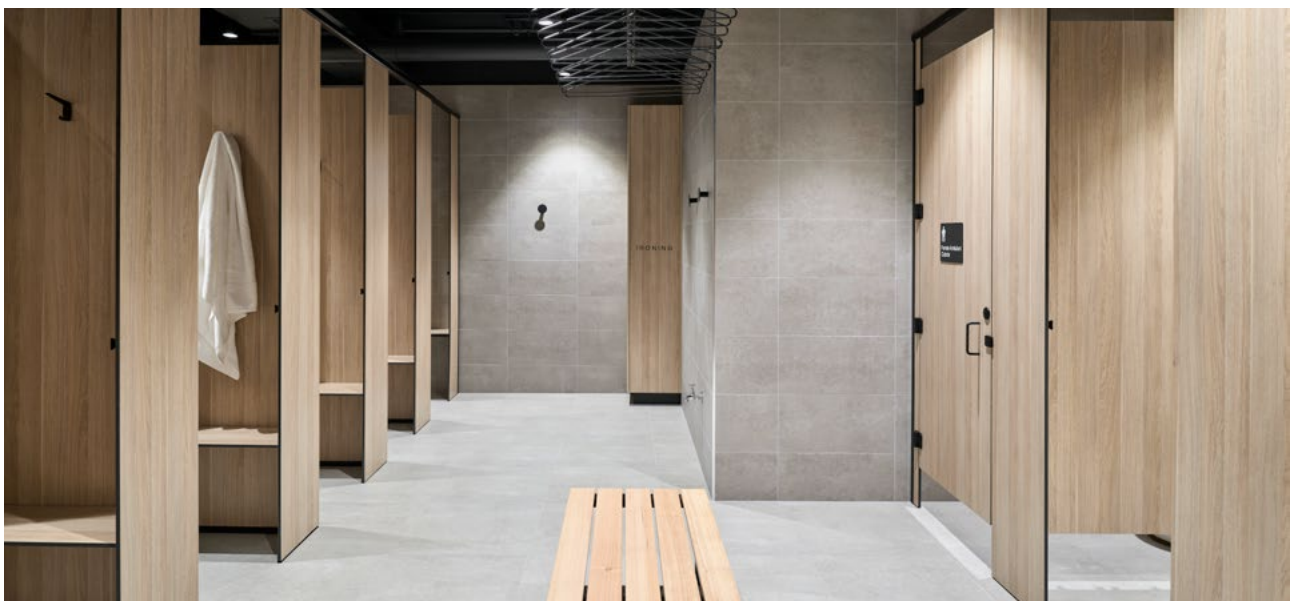

Cleaner environments, everywhere

Laminex Protec+ can be used to create a safer, cleaner environment anywhere, including hospitals, schools, hotels, shops, cafes, sport facilities and public toilets.

Proved effectiveness

Laminex Protec+ has been independently tested in accordance with a number of leading standards, including: ISO22196:2011, JIS Z2801 and ASTM G21, which measure antimicrobial activity and fungi resistance.
